

Sugar Ray Ledesma

Senior Full Stack Engineer | Python, Django, Node.js | React, Next.js | AWS + AI

✉ sugarledesma2000@gmail.com  linkedin.com/in/ledesma-sugar-ray 📍 Taguig City, Metro Manila

SUMMARY

Senior Full Stack Engineer with 7+ years of experience designing, building, and scaling cloud-native SaaS and enterprise applications using **Python (Django, DRF)**, **Node.js**, **React**, **Next.js**, and **TypeScript**. Experienced in developing high-performance APIs, distributed systems, and microservices architectures that enhance scalability, reliability, and user experience.

Strong background in **REST & GraphQL APIs**, database optimization (**PostgreSQL**, **MongoDB**), asynchronous processing (**Celery**, **Redis**), and cloud infrastructure on **AWS**. Skilled in building secure, scalable applications using **OAuth 2.0**, **JWT**, **Docker**, **Kubernetes**, and modern CI/CD practices.

Combines deep full-stack expertise with **AI-assisted development workflows**, leveraging **GitHub Copilot**, **ChatGPT**, **Claude**, and **Cursor** to accelerate development, improve code quality, streamline debugging, and enhance engineering productivity.

CORE SKILLS

Backend Engineering: Python, Django, Django REST Framework, Node.js, Express.js, REST API Architecture, GraphQL APIs, Microservices Design, API Security

Frontend Engineering: React.js, Next.js, Vue.js, TypeScript, JavaScript (ES6+), Redux, Tailwind CSS, Responsive UI Architecture, Component-Based Design Systems

AI-Assisted Development: GitHub Copilot, ChatGPT, Claude, Cursor IDE, Prompt Engineering, Generative AI, Large Language Models (LLMs), AI-Powered Code Generation, AI-Assisted Debugging, Technical Documentation Generation

Database Engineering: PostgreSQL, MySQL, MongoDB, Schema Design, Query Optimization, Indexing Strategies, Data Modeling

Cloud & DevOps: AWS (EC2, S3, RDS, Lambda), Docker, Kubernetes, GitHub Actions, CI/CD Pipelines

Asynchronous & Distributed Systems: Celery, Redis, Event-Driven Architecture, Background Jobs, Task Queues

Security & Reliability: OAuth 2.0, JWT Authentication, Access Control Architecture, Application Security, Monitoring

Testing & Engineering Practices: Unit Testing, Integration Testing, Jest, Cypress, Debugging, Agile/Scrum

Collaboration & Practices: Code Reviews, Documentation, Clean Code, Agile/Scrum

WORK EXPERIENCE

Softype, Inc

04/2024 – 05/2026 | Palo Alto, CA

Senior Full Stack Engineer

- Architected and delivered cloud-native SaaS platforms using **Python**, **Django**, **React**, **Next.js**, and **AWS**, enabling scalable multi-tenant applications and supporting rapid feature delivery.
- Engineered scalable **REST** and **GraphQL APIs** that powered multi-tenant systems and supported reliable data access across distributed services.
- Led migration initiatives from monolithic applications to **microservices architecture**, improving scalability, deployment flexibility, and system maintainability.
- Built distributed processing pipelines using **Celery** and **Redis**, reducing background job execution times by **50%**.
- Optimized **PostgreSQL** performance through query tuning and indexing strategies, reducing API response times by **40%** and enhancing overall system responsiveness.
- Delivered modern frontend experiences with **React**, **Next.js**, and **TypeScript**, improving responsiveness and usability across customer-facing applications.
- Implemented secure authentication and authorization frameworks with **OAuth 2.0**, **JWT**, and role-based access controls across distributed services.
- Established automated **CI/CD Pipelines** using **GitHub Actions**, **Docker**, and **Kubernetes**, reducing deployment time by **60%** and increasing release reliability.
- Mentored engineers through **code reviews**, **architecture discussions**, and **AI-assisted development workflows** using **GitHub Copilot**, **ChatGPT**, **Claude**, and **Cursor**, improving team productivity and strengthening engineering consistency.

Ascent Technosoft

01/2023 – 03/2024 | Newark, DE

Software Engineer

- Designed and developed enterprise-grade backend services using **Python**, **Django**, and **Django REST Framework** for scalable business applications.
- Built secure **REST APIs** and **GraphQL APIs** using **Node.js** and Django, enabling seamless communication across internal systems and third-party integrations.
- Delivered frontend functionality using **React**, **Next.js**, and **TypeScript** for both customer-facing products and internal business platforms.
- Architected and deployed cloud-native services on **AWS Lambda**, **EC2**, and **RDS**, supporting growing application workloads and business demands.
- Optimized **PostgreSQL** and **MongoDB** performance through query tuning, indexing strategies, and schema enhancements, reducing query execution times by **30%**.
- Implemented secure authentication and authorization using **OAuth 2.0**, **JWT**, and modern access-control practices.
- Developed asynchronous processing solutions using **Redis**, task queues, and background job execution frameworks to improve scalability and responsiveness.
- Containerized applications with **Docker** and contributed to architectural standards, debugging initiatives, and performance optimization efforts.

Software Co

05/2021 – 12/2022 | Sydney, NSW

Full Stack Developer

- Built customer-facing web applications using **React**, **Vue.js**, and modern **JavaScript**, delivering responsive and engaging user experiences.
- Designed interactive **analytics dashboards** that enabled real-time reporting, data visualization, and faster business decision-making.
- Refactored legacy frontend systems into reusable **component-based architectures**, reducing technical debt and improving maintainability.
- Integrated frontend applications with backend services built using **Node.js**, **Django**, and **REST APIs** to support seamless data exchange.
- Optimized frontend performance through **lazy loading**, caching strategies, and rendering improvements, reducing page load times by **35%**.
- Developed reusable UI components and design systems that accelerated feature delivery and improved consistency across projects.
- Supported deployment automation and cloud operations using **AWS**, **Docker**, and **CI/CD Pipelines**, contributing throughout the software development lifecycle.

LaQuest Inc

01/2019 – 04/2021 | Taguig City, NCR

Junior Full Stack Developer

- Contributed to the development and maintenance of web applications built with **JavaScript**, **React.js**, **Node.js**, and **Django** within Agile engineering teams.
- Built reusable **UI components** and responsive interfaces that improved usability, consistency, and maintainability across application modules.
- Developed and integrated **REST APIs** to enable secure and reliable communication between frontend and backend systems.
- Implemented backend functionality using **Python**, **Django**, and **PostgreSQL**, supporting business workflows and operational requirements.
- Assisted in database design, schema development, and **SQL query optimization** to improve application performance and data management.
- Participated in debugging, troubleshooting, testing, and production support activities, helping maintain application stability and reliability.
- Collaborated within **Agile/Scrum** teams while contributing **authentication features**, **version-control workflows**, and **full-stack application** development.

EDUCATION

B.Sc. in Computer Science

06/2017 – 04/2021 | Taguig City, NCR

Taguig City University
